EDUCATION

University of Colorado Boulder, Engineering Honors Program

Boulder, CO

Bachelor of Science – Mechanical Engineering

August 2024 – May 2028

Minor – Engineering Management

Relevant Coursework: Thermodynamics, Fluid Mechanics, Statics and Structures, Component Design, Mechanics of Solids, Materials Science, Differential Equations, Linear Algebra

Activities: CU Formula SAE, CU Fly Fishing Club Officer, Alpha Tau Omega Executive Board

ENGINEERING EXPERIENCE

Engineering Intern

June – July 2026

ESAB Corporation

Hanover, PA

- Created, prototyped, and tested new ESAB products with R and D department, primarily focusing on electrodes, welding wire, flux, and hardfacing techniques
- Designed and built a custom AI model to automate product testing data collection and streamline data access for the 8-person engineering team
- Completed a literature review of Wire Arc Additive Manufacturing and worked with ESAB clients to apply WAAM to large-scale civil, aerospace, and naval projects
- Worked with expert test welders and various ESAB offices around the world to facilitate global product launches

Tensentric Human-Centered Design Award

September – December 2024

- Designed and produced a portable camping stove attachment for safe outdoor cooking on uneven ground (the "Stable Stove")
- Led CAD and prototyping phases within a team of four peers using Solidworks and OnShape
- Competed and won at the 2024 Collegiate Engineering Design Expo, featuring 89 teams and over 500 students
- Awarded as the team which "Best Optimized User Experience"

Powertrain Engineer – CU Boulder Formula SAE

September 2024 – Present

- Created and manufactured a custom powertrain for a student-built race car with fellow CU engineering students
- Designed specific elements such as the chain guard and spacers using SolidWorks, FEA, and various machining techniques
- Successful design, manufacture, and assembly of entire vehicle in a 9-month time frame while working with multiple other subteams
- Team placed 31st and 60th in the Formula SAE 2025 and 2026 Championship

ILF Youth Innovation Contest Bronze Winner

May - August 2021

- Developed wireless electric car charger in a team of three, including prototype, cost, and market assessment
- Built fully accurate simulations of large-scale manufacturing using quantitative modeling
- Presented to prominent STEM leaders from over 80 countries, placed 3rd out of 68 high school and college teams

ADDITIONAL EXPERIENCE

Server – Topgolf

May – August 2025

- Order-taking and transport of food, beverages, and necessary kitchen items throughout the establishment
- Reliable, professional communication with customers, team members and managers to fulfill duties

Caregiver for Neighbor with Cerebral Palsy

June 2020 – August 2024

- Before and after-school care for a local woman with Cerebral Palsy, including lifting her from bed to wheelchair and back, as well as other caregiver responsibilities
- Over 2500 care-giving visits fulfilled during high school in reliable, courteous fashion

Varsity Rowing, DC National Rowing Club

August 2021 – June 2024

- Multiple medal-winning rower across over 30 competitive races
- Two-time National Championship qualifier, consistently among top four teams in the Mid-Atlantic region

SKILLS

Software: SolidWorks (CSWA), OnShape, FEA, Excel, MATLAB, Java, Python, JavaScript, LaTeX

Machining: Welding (TIG, MIG, Stick), 3D printing, CNC Milling, Lathes, Drills
